

Local Land Charges Pre-release notice April 2024

Prospective Release Date: 09/04/2024

New mapping screen appearance

A revised layout of the map used to conduct searches has been introduced, to improve clarity and accessibility.

Please note:

- Existing functionality remains unchanged.
- Mapping buttons at the top of the map have now been replaced by radio buttons on the right side of the map.
- More informative descriptions for each function are displayed.
- Please note: the 'copy from map' function has been renamed 'Select area from map.'

Find a search area by map

To view a local land charge, you will need to identify a property or area of land. This is called a search area.

Map key ☐ Location available ☐ Location not available

- **Use the map with only the keyboard**

New functionality aimed at supporting users with accessibility needs has been introduced. The following functions can now be used using only a keyboard, removing the need to use a mouse to conduct a search:

- Select area from map
- Delete area
- Panning and zoom of the map

How to use the map with a keyboard only

Select an area from the map and delete areas using a keyboard only. The keyboard focus needs to be on the map to do this. You can not draw or edit an area using a keyboard.

Keyboard controls

Arrow keys to move the map up, down, left and right.

SHIFT key with arrows to fine-tune the position.

Plus sign (+) to zoom in and Minus sign (-) to zoom out.

SPACE bar or ENTER key to select the area at the centre of the map
